

SERVICES

SOFTWARE ENGINEERING SERVICES

CFT develop dedicated software based on J2EE or .NET platforms. In order to ensure top quality of the developed software we run all development projects in 3 main stages:

- **Project Management/Analysis** – analysis performed with customers input ensure precise definition of functional requirements, specification as well as smooth project management in the phase of implementation of production releases and the launch of support activities. We are flexible to share resources with customer PO team.
- **Development** – development of dedicated software based on J2EE or .NET platforms
- **Testing and Deployment** – testing procedures are an integral part of the development of any tailor made application. All testing services can be provided by CFT both as a part of application development projects and also as a separate service due to unique methodology applied by our testers.
